

There are four problems from the book. They're all abstract, with no practical motivation or story. If you want more practice, then do more problems from the book, or see me. There's also one example to study.

As the schedule indicates, this homework should be handed in on Day 25, not Day 24, because of the exam on Day 23.

Exercise 9.11

Exercise 9.12

Exercise 9.14

Exercise 9.15

Also, Example 9.19 is mathematically identical to our classwork problem about Ezinma's tips. It shows how to use a symmetry argument to solve the final case, which we called case C. Study this argument. There is nothing to hand in about it.
